

Information session for parents Sensory differences and behaviour

In this virtual session we will discuss sensory differences in children from the perspective of Occupational Therapy, why some children have sensory processing differences and what can be done to support these children.

*This parent information session will take place on
Thursday 12th May 10am—12:30pm via MS Teams.*

You can access this information session without a referral to Occupational Therapy services just as long as you are a parent living in Haringey and you feel you would benefit from learning about sensory differences in children.

To book a place on this parent information session please send an email to Makeela.foster1@nhs.net
