

Junk Modelling - Christmas Holiday Art Challenge

Have you got lots of recycling?

Can you make a 3D junk modelling sculpture out of it?

The whole school is being asked to get inventive with their rubbish over the holidays. If you would like to take part, this is a fun activity for children and parents to use up some of their Christmas recycling and share their creations with the rest of the school in the New Year.

- Can you make an imaginative creature or an abstract 3D sculpture?
- How could you join shapes together?
- Cut, stick, attach, fold, join...what can you make?
- Can you paint or decorate the surface of your sculpture?
- You could try collaging old wrapping paper or colourful scraps of card.

You could look here at Tate – Kids for how to make a cardboard box sculpture like the work of artist Phyllida Barlow

<https://www.tate.org.uk/kids/make/sculpture/make-cardboard-box-sculpture>

Bring in your final junk modelling sculpture or a photo of it to show your class after the holidays.
