

STEM ROBOTICS

INTRO TO GAME DESIGN

Calling all budding engineers and robotics enthusiasts! Embark on an exciting journey into the world of Robotics & Coding with RoboThink

Introducing RoboThink Jr., the perfect opportunity to introduce your child to the captivating world of engineering and robotics. With a focus on simplicity and personal creativity, children will experience the wonders of RoboThink in a way that is both entertaining and educational. From building and battling tops to mastering the art of bow shooting and even enjoying board games, every activity is designed to provide endless fun while developing essential skills. Watch your child thrive and discover the joy of learning through play!

Get ready to unleash your creativity as you build and personalize your very own simple game using RoboThink's exceptional software. Whether you're a coding novice or have some experience, this workshop is open to all skill levels. Basic computer skills are a must as you dive into the thrilling realm of video game design. Prepare to bring your wildest ideas to life!
